

## **HUMAN NEUROPEPTIDE Y-LIKE G PROTEIN-COUPLED RECEPTOR**

### **ABSTRACT OF THE DISCLOSURE**

5           Reagents which regulate human neuropeptide Y-like G protein-coupled receptor  
(NPY-like GPCR) protein and reagents which bind to human NPY-like GPCR gene  
products can play a role in preventing, ameliorating, or correcting dysfunctions or diseases  
including, but not limited to, obesity, diabetes, anxiety, hypertension, cocaine withdrawal,  
congestive heart failure, memory enhancement, cardiac and cerebral vasospasm,  
10    pheochromocytoma, ganglioneuroblastoma, Huntington's disease, Alzheimer' disease, and  
Parkinson's disease.
